

“A charge you **never made**. A call you didn’t want to make. And a median of **16 days** before anyone sorts it out.”

Slow

1 in 5 card disputes breaches the SLA (20.6%), while the customer waits.

Error-prone

1 in 7 complainants has to come back (14.8%): the first contact didn't fix it.

Expensive

Half of all disputes go through the call center, the costliest channel (50.4%).

Chargeback: the bank asks the merchant to return the money. **Visa reason code:** the formal reason for the claim.

WHY NOW

Disputes are growing, and a bad one costs the customer.

106M

disputes processed by Visa globally in 2025, **+35% vs**

2019

Source: Visa

41%

of debit cardholders who disputed were **less likely to use the card** afterwards

Source: Auriemma Research

59%

of adults in Latin America pay digitally, **up from 43% in 2014**

Source: World Bank Global Index (LAC, 2014–2024)

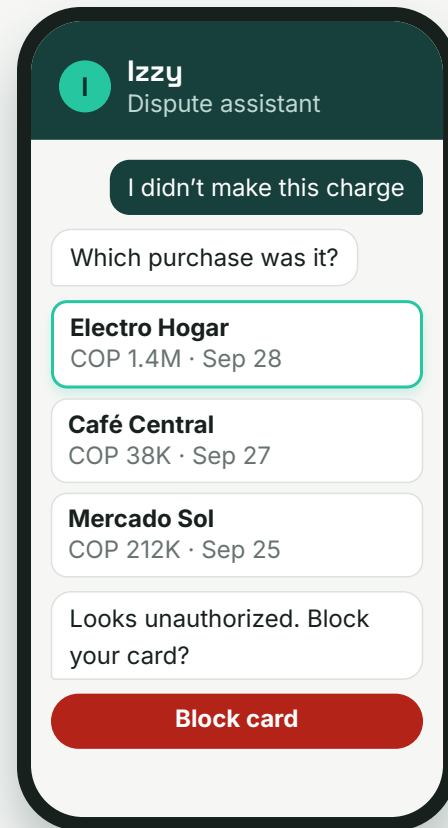

More digital payments → more disputes → **every one is a moment of truth for the bank.**

THE SOLUTION

Meet Izzy.

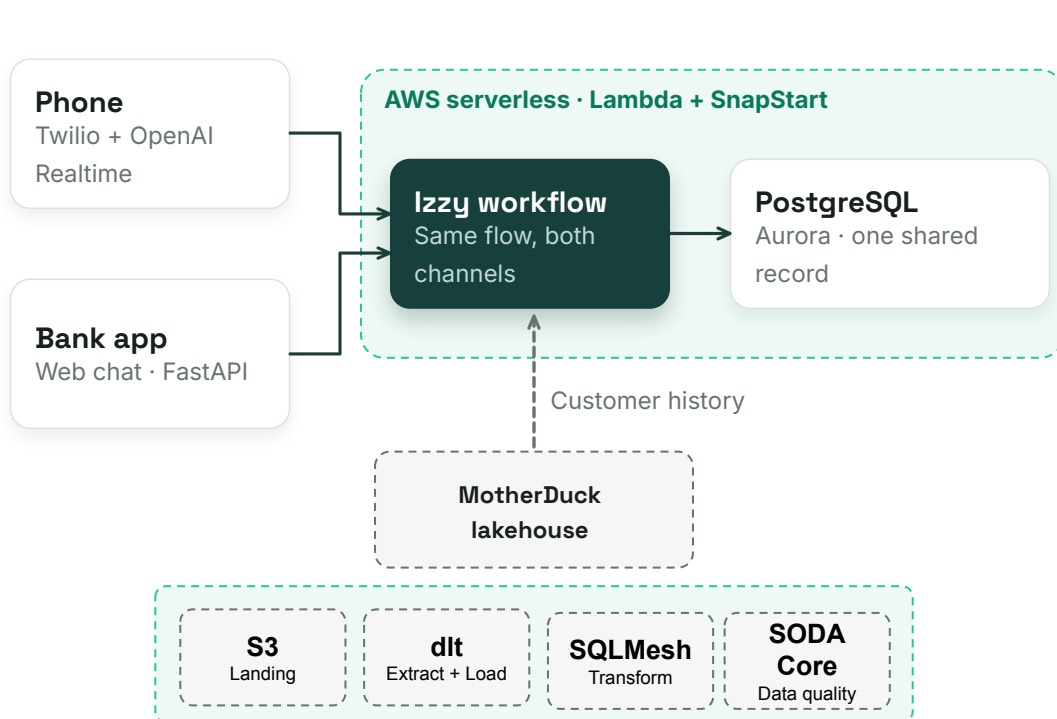

One AI dispute assistant for Latin American card issuers. On the phone and in the bank's app.

-  Listens in Portuguese, Spanish and English
-  Shows up to 3 matching purchases
-  Blocks the card instantly on fraud
-  Files the claim

HOW IT WORKS

Two channels, one brain, one database.

One database

Block a card on the call. It shows blocked in the app.

Lakehouse

Full customer history to find the right purchase.

Serverless AWS

Low cost, scales with demand.

KEY TECHNICAL DECISIONS · BUILT FOR A BANK

AI proposes. The bank decides.

The model understands

Turns the customer's words into structured intent.

It never writes to the database.

The backend decides

Identity, purchase, Visa code, card block and claim via deterministic code.

Confidence thresholds + explicit customer confirmation.

Last 4 card digits only

Least-privilege access

Prompt-abuse filter

Human agent escalation available

Stack: OpenAI (realtime voice + structured output) · TypeSafe Jev (bounded decisions) · LangGraph (flow) · LangSmith (traceability)

RESULTS

Working end to end, in voice and chat.

2

channels: phone and in-app
chat

3

languages: PT, ES, EN

500+

CSAT survey

EXPECTED IMPACT FOR THE BANK

Fewer agent minutes

Baseline: 7.2 min per dispute

~78% lower cost

The \$1.31 → \$0.29 per dispute
(est.)

No accent mismatch

18.59% accent mismatch →
configurable accent for agent

Faster Responses

Currently the client has to wait
on average 120s on the line

NEXT STEPS

Connect to the issuer's core systems and Visa

Production-grade customer authentication

Live handoff to a human agent from the app

Secure query tool for account questions

Simulate dispute approval or denial

Refunds and temporary credit

Simulate credit card limits

Resume previous complaints

Izzy turns a customer's worst moment with their bank into a **2-minute experience.**
